# OUR SERVICES.
# PROJECT DELIVERY

While you have clear vision on business goals, we collaborate on technical design and take care of project management.

BLACKTHORN
VISION

# WHO WE ARE

Blackthorn Vision is a Ukrainian custom software development company that enables start-ups, midsize companies and large organizations to achieve their strategic business goals by providing high performing technology engineers to deliver projects on time and budget, develop ideas from initial concepts to final product.

## Microsoft
## Silver Partner

# KEY TECHNOLOGIES

Being a certified Microsoft partner and backed by highly qualified and experienced .NET engineers we have garnered instrumental expertise in incorporating the latest tools and .NET development strategies to guarantee successful projects delivery of any size and complexity.

Blackthorn Vision complements technological stack with strong expertise in JavaScript, React.js, Angular, TypeScript, Electron.js, Node.js, Native iOS (Swift, Objective-C), Android (Kotlin), Xamarin, AWS and Google Cloud.

# COMPARATIVE TABLE

**BLACKTHORN** VISION

| Responsibility | Dedicated Team | Project Delivery | Startup Development |
|---|---|---|---|
| **PRODUCT DEFINITION** Project objectives and strategy, Budgeting and Profitability, Market research, Personal needs | You | You | Cooperation |
| **PRODUCT DESIGN** Technical requirements and architecture, Product roadmap and deadlines, User experience and interface etc. | You | Cooperation | BLACKTHORN VISION |

| **ENGINEERING & ADMINISTRATION** Code and tests implementation, Release and operations execution, Office and IT infrastructure, HR and consultancy | BLACKTHORN VISION | BLACKTHORN VISION | BLACKTHORN VISION |

# PROJECT DELIVERY

If you want your product built with the latest development methodologies and cutting-edge tech, you've come to the right place. We set up a managed development team for you and take responsibility for all processes, from requirements management and project planning to quality assurance, deployment, and DevOps.

# WHEN TO USE

- You want to focus on business requirements

- You lack expertise in a specific technology

- You need help with technical design

- You want to free up your in-house engineers

- You want to delegate low-level project management

- You want to reduce costs and optimize budget

# HOW IT WORKS

## Assessment

Through a discussion with you, we gather all requirements and related information about a project in detail in order to understand your business needs and project scope.

## Discovery Phase

If requirements are not clear enough, we send you a proposal for Discovery Phase / Audit. We deliver a complete technical design, product roadmap, backlog and wireframes.

## Development and Quality Assurance

After our development team implements functionality according to the requirements, our quality assurance team performs manual and automated testing according to our corporate standards. We monitor progress and provide regular demo meetings to share and approve the current state of the project.

## Delivery

We deliver all project artifacts and knowledge base, and provide deployment assistance if necessary.

## Support

We provide system health monitoring, infrastructure maintenance, data backups, and product enhancement.

# WHAT YOU RECEIVE

**01**  **Start within 2 weeks**

We setup engineering team according to your project needs and will be able to start work within 2 weeks.

**02**  **Delivery Management**

We take responsibility for team management, requirements, and operations to guarantee expected results within budget and time.

**03**  **Transparent work environment**

We keep you updated about the progress of your project and a clear picture of costs allocation against agreed benchmarks.

BLACKTHORN VISION
